

THE COVID-19 VACCINES ARE SAFE, EFFECTIVE, AND CAN HELP KEEP OUR SCHOOL COMMUNITY HEALTHY.

The COVID-19 vaccines have been used under the most intensive safety monitoring in U.S. history, which includes studies in adolescents (CDC).

The COVID-19 vaccines cannot give you COVID-19.

COVID-19 is still a risk for individuals of all ages, including children and adolescents.

COVID-19 vaccines have proven extremely effective at preventing severe illness, hospitalization, and death from COVID-19.

Being vaccinated is the best way to protect yourself, friends, family, and our school community from the virus.

EVERY SHOT MAKES A DIFFERENCE.
